

Aqueducts route

Home / Water sport / Navigational routes / Aqueducts route

The lakes area in the south western region of Friesland has no less than five aqueducts.

They allow you to sail around this part of the province unhindered, and offer the ideal solution for bottlenecks where water and road traffic meet.

The Galamadammen aqueduct:

- Draught: 2.10 metres
- Width: 20.75 metres
- Length: 394 metres

The Ee aqueduct:

- Draught: 1.90 metres
- Width: 10 metres
- Length: 453 metres

the Jeltesloot aqueduct:

- Draught: 2,10 meter
- Width: 15,50 meter
- Length: 530 meter

The Houkesloot aqueduct:

- Draught: 1,70 meter
- Width: 15,50 meter
- Length: 282 meter

The Geeuw aqueduct

- Draught: 1,70 meter
- Width: 50 meter
- Length: 750 meter
